Total Streams Skips Streams Skipped

Balanced Listening Styles - You have both passive listening (trackdone, appload) and active listening (fwdbtn, clicked, backbtn).

Skip-Forward Habit - fwdbtn being the second-most common means you sometimes seek variety or quickly jump to preferred tracks.

Replays & Favorites — backbtn count is significant; could be mined to find your “most replayed” songs.

Device Switching - Small but notable number of plays start on other devices (remote).

Spotify Autoplay is Working - High trackdone suggests you let Spotify's algorithm pick follow-up tracks often.
